DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being fully anticipated by Eichenlaub (5500765).

Re claim 11, Eichenlaub teaches for example in fig. 1, 2 and 5, a lens adapter an attachment unit comprising: for detachably attaching the lens adapter (via 6) to a communication terminal device (col. 4, ln. 48) having a display unit (22) for displaying two-dimensional picture (col. 6, ln. 54-55); and a microlens unit including a pair of microlens arrays (16 and 18) and positioned confront the display unit (col. 6, ln. 40-45) with a spacing substantially equal to a focal length of the microlens unit (col. 6, ln. 49-53) when the lens adapter is attached to the communication terminal device.

Re claim 12, Eichenlaub further teaches for example in fig. 1, a panel unit (18) for supporting the microlens unit (66) and being movable between a first position at which the microlens unit confronts the display unit and a second position at which the microlens unit does not confront the display unit (col. 5, ln. 54-57).
